

# Ingenious Locking Technology for HVACR systems according to VDI 6022

### **About EMKA**

The EMKA GROUP is world market leader for locks, latches, hinges and seals used in switch and control cabinets.

For more than 40 years, the company has been active across all sectors in the fields of industry (switch and control cabinets, HVACR systems, mechanical engineering) and transport (railway and commercial vehicles, caravans, etc.) with conventional and electronic locking solutions.

The overall range comprises more than 30,000 catalogue and special articles, which are developed, manufactured, refined and assembled at eleven production sites in Germany, France, Great Britain, Spain, Bosnia-Herzegovina, Serbia, China, India and Indonesia.

In one of the two new plants in Bosnia, the company produces around 900 moulds for injection moulding and die casting every year - both for own production and for external customers.

With 2,100 employees, EMKA serves over 36,000 customers in 55 countries worldwide. In 2020, the company achieved turnover of over 295 million euros.

EMKA - Ingenious Locking Technology.

# **Worldwide first choice**

- 2,100 employees
- Own production at 11 international locations
- Represented in 55 countries worldwide
- More than 30,000 catalogue and special products
- More than 36,000 customers worldwide

Company headquarters Velbert, Germany

# **Solutions for HVACR systems**

EMKA not only produces a variety of locks, latches and hinges, but also offers seals as well as edge protection profiles and thus complete RLT closure solutions from a single source. They are characterised by modular design, versatility and the highest quality. EMKA locking solutions meet the special requirements of the industry and are aligned with relevant standards such as DIN EN 1886 or VDI 6022.

In addition, EMKA provides individual special solutions which are developed in dialogue with the customer.

Whether locks, latches, handles, hinges or seals for diverse applications: EMKA products always stand for maximum safety and reliability.

As a long-time system partner of the HVACR industry, EMKA is constantly working on new and innovative products. In addition to newly developed and enhanced locking solutions, EMKA complements its product portfolio with innovative locking systems, special hinges, seals and special solutions, thus responds to the current requirements of the market.

EMKA already has the trends that will become the standard tomorrow!

#### Modular locking system

- New modular handle with an innovative design
- Suitable for doors opening inwards and outwards
- Suitable for various door thicknesses (25 100 mm)
- Fits 3 standard cut outs (13 mm, 19 mm, 24 mm)
- Interchangeable locking sets for external or internal locking (blind plug, round cylinder, square, other inserts on request)
- Adjustable roller cam
- Adjustable eccentric roller
- Removable handle during transport
- Meets the industry-specific national and international standards
- Conforms with the entire EMKA program
- Material: Polyamide with glass fibre (VDI 6022 / ISO 846 compliant materials)
- Air Tightness class L1-L3 possible
- Protected design

- New modular locking system especially for use on large doors (>1.6 m door height)
- Various inserts and handle options in combination with different cams possible (stepped cam, pressure relief cam, etc.)
- System for various door thicknesses available (30 mm 60 mm)
- Also available as version without inside handle
- VDI 6022 / ISO 846 compliant materials on the inside of the door

#### Latch-Hinge with emergency opening

- Especially suitable for use on large doors (>1.6 m door height)
- When the door is closed, the latch is adjustable (3 mm) to achieve perfect alignment
- The favourable pivot point of the handle makes a seal compression of 5 mm possible using low actuation forces
- Door or panel can be removed by unlatching the handles on both sides
- 3D adjustable (tolerance compensation)
- Latch hinge can be mounted as one piece with the door / flap in place
- Right or left hinged
- Hinge 180° opening angle
- Optional latch-hinge with safety function "pressure relief" can be ordered
- Patent submitted
- VDI 6022 / ISO 846 compliant materials on the inside of the door
- ATEX compliant explosion protection version available on request

### Latch-Hinge large

- For door surfaces > 0.8 m<sup>2</sup>
- The favourable pivot point of the handle allows for low actuation forces a seal compression of 5 mm
- When the door is closed, the latch is adjustable (3 mm) to achieve perfect alignment
- Door or panel can be removed by unlatching the handles on both sides
- Hinge 180° opening angle
- 3D adjustable (tolerance compensation)
- Available with or without pressure relief
- ATEX compliant explosion protection version
  available on request
- Patent submitted

### Bow-type handle

- Ergonomic bow-type handle
  made of reinforced polyamide
- Mounting of the bow-type handle by choice. The use of cylinder head screw, hexagon head screw, countersunk screw or nuts can be accommodated, depending on the version
- Handle and cover are available in color and / or antibacterial version
- Bow-type handle also usable without cover
- Protected design

### Latch-Hinge small

- For door surfaces < 0.8 m<sup>2</sup>
- 40 % reduced size → significant price advantage
- The favourable pivot point of the handle allows for low actuation forces a seal compression of 5 mm
- Door or panel can be removed by unlatching the handles on both sides
- Hinge 180° opening angle
- 2D adjustable (tolerance compensation)
- Available with or without pressure relief
- ATEX compliant explosion protection version
  available on request
- Patent submitted

#### **3D Unit connector**

- 3D positioning through spherical shaping with max.
   X-axis 7 mm
   Y-axis 3 mm
  - Z-axis 5 mm
- Fixing by M6 cylinder screws or riveted bolts possible
- Cylinder screw included
- Industry standard mounting dimensions
- Covering cap optionally available
- VDI 6022 / ISO 846 compliant materials

#### Clip-on profile according to hygiene standard VDI 6022

- Higher functionality when sealed with sponge rubber in the hose area
- Seal does not form a breeding ground for microorganisms
- Easy to clean
- Moisture resistant
- Odourless
