

Ingenious
Locking Technology

- 
- A light gray world map with several locations marked. In North America, there are white circles in the US and Mexico, a blue square in the Northeast US, and a blue circle in Mexico. In South America, there is a white circle in Argentina. In Europe, there is a white circle in the UK. A legend in the bottom left corner defines the symbols: a dark blue square for Headquarters, a blue square for Production site, a blue circle for Subsidiary, and a white circle for Agency/Sales Office.

Sales Worldwide

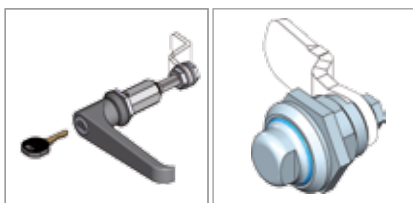

The EMKA GROUP is the world leader for locking systems, hinges and sealings, which are used in cabinets and control cabinets for electronics and electrical engineering. In the areas air conditioning technology and transport, EMKA is one of the leading manufacturers of locking technology. The company is represented in 50 countries employing more than 1,500 employees.

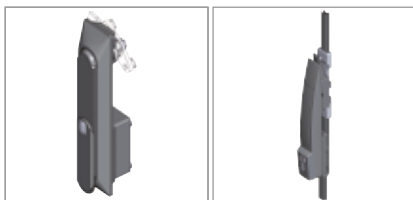

In-House Production

Currently, the overall range comprises more than 15,000 articles, which are developed, manufactured, refined and assembled at ten production sites in Germany, France, Great Britain, Spain, Bosnia and Herzegovina, Serbia, USA and China.

Modular Range

The range of EMKA products is consistently modular. No matter whether made of stainless steel, zinc, aluminium or plastic, the products meet national as well as international standards, e. g. resistance class RC2 and are available up to the IP rating IP69K.

In-House Engineering

By continuously developing the products further in the in-house technology centre with 22 design engineers, EMKA ensures that the customer can always benefit from innovative and efficient solutions. You will find further products under www.emka.com

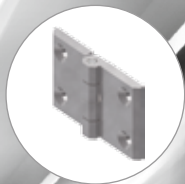

Hinge
can be made flame-resistant

Silicone gasket
flame-resistant

EPDM gasket
flame-resistant

Hinge
can be made flame-resistant

Compression latch
can be made flame-resistant

Safety quarter turn
flame-resistant

National railway key

Aluminium windows

Locking Systems for Railway Vehicles

EMKA also offers special solutions specifically for the railway vehicle construction in its business unit Transport.

These particularly include vibration-proof locks, on request with compression function and/or opening indicator, EPDM and silicone gaskets that are fire protection tested according to DIN EN 45545-2.
